

ENVIRONMENTAL POLICY

Policy Statement

We at Raffles Maldives Meradhoo are conscious of global environmental issues and acknowledge our responsibility towards the environment. While the well-being of our guests remains at the forefront, we commit ourselves to carrying out operations sustainably, taking every step to minimize operational impact on and preserve the environment wherever we operate.

In delivering this commitment, Raffles Maldives Meradhoo will endeavour to:

- Meet or exceed applicable environmental legislations, environmental standards and best practices.
- Monitor & document energy consumption & related emissions daily & analyze monthly, quarterly & annually for review to reduce energy consumption & related emissions by 2% or more concerning the energy consumption & resultant emissions specified in the annual plan for the financial year.
- Value and preserve the natural heritage of our property, thus enabling our guests to enjoy an authentically local experience.
- Promote efficient use of materials and resources across our property, especially water and energy.
- Work diligently to minimize our waste stream by reusing, recycling and conserving natural resources, mainly through energy and water conservation.
- Set sound environmental and social objectives and targets, integrate a review process and issue progress reports periodically.
- Continually identify opportunities for improvement of our environmental management system.
- Promote awareness and educate our colleagues on environmental issues and sustainable working practices.
- Engage our guests, colleagues, suppliers, contractors and the local community in our initiatives to preserve the environment and consider their opinions/ feedback when setting our environmental programs and procedures.
- Conduct environmentally preferable purchasing.
- Participate in efforts to improve environmental protection at local and national levels.

Objective

This policy is intended to guide our property towards sustainable management.

1. ENVIRONMENTAL AWARENESS

- We will maintain awareness among our colleagues of environmental issues, the preservation of local cultures, and the necessity for everyone to act responsibly.
- We will communicate to our colleagues the environmental practices that need to be implemented at the workplace and other simple environment-friendly measures that they can apply in their everyday lives.
- We will encourage our colleagues to participate in and support environmental initiatives.
- We will communicate our environmental commitment to guests and allow them to support us in our green initiative.
- We will extend awareness of environmental issues and best sustainability practices to the local community.

2. ENERGY

Reducing energy consumption will help to reduce environmental impact and, at the same time, reduce energy costs. To minimize energy consumption, we will:

- Take steps to make our workplace more energy-efficient
- Reduce the use of fossil fuels and opt for renewable energies
- Maintain our machinery and equipment in good working condition
- Opt for energy-efficient equipment and low-energy appliances

- Ensure optimal use of plant and machinery
- Use timers, sensors and other devices that regulate energy consumption
- Make use of solar energy wherever applicable
- Reduce energy loss, for example, by using insulated pipes to carry hot or chilled fluids
- Set objectives for limiting consumption and regularly monitor progress to improve processes
- Implementation of solar heating & power projects throughout the resort

3. WATER

With global warming, particularly in the Maldives, freshwater sources are very scarce and limited to a few natural wells. Water conservation is therefore becoming essential, and as a responsible company, we will:

- Use seawater to generate water for the entire resort
- Reduce water losses by regularly checking for leaks
- Install sensors, regulators and other water-saving devices - i.e. sensor-controlled men's urinals
- Ensure efficient use of laundry equipment
- Sensitize both our colleagues and guests on the responsible use of water
- Offer guests the option of reusing towels and sheets
- Limit the use of de-salinized water by
 - Capturing and using rainwater wherever possible
 - Using recycled greywater for irrigation
- Set targets for minimizing water consumption, monitor and analyze periodically
- Continually find ways to reduce water consumption

4. WASTE

We generate waste that constitutes a significant pollutant, affecting the environment and public health. We will do our utmost to avoid, recycle and reuse to reduce its environmental impact. Our Waste Management Plan will include the following:

- Limit the use of disposable packaging for the resort supplies whenever possible.
- Use compostable and bio-degradable products and materials whenever the option is available.
- Limit individual packaging of hygiene products in bedrooms.
- Organize sorting and separating of recyclable wastes.
- Collect and recycle cooking oil for permitted uses.
- Compost our garden green waste for nutrient-rich natural fertilizer.
- Organize recycling of materials such as paper/cardboard/glass/plastic packaging, metal cans, ink cartridges, restaurant organic waste, etc.
- Liaising with 3rd party recycling companies such as Parley for Oceans and Secure Bag
- Engage in projects with the local community for the reuse of recycled materials.
- Safely dispose of hazardous wastes such as batteries, electrical and electronic devices, fluorescent bulbs/tubes, etc.
- Organize and/or support clean-up of the surrounding environment.
- Implementing BIO GAS project across AHR

5. GREEN PROCUREMENT (ENVIRONMENTALLY PREFERABLE PURCHASING)

Green procurement or Environmentally Preferable Purchasing (EPP) is the practice of procuring products and services less harmful to the environment (land, air and water) and all species that depend on the environment for survival. Green products are those produced with less harmful materials or which, upon usage or consumption, would have a minimal impact on the environment.

We will carry out EPP whenever green options are available while giving due consideration to guest satisfaction, company standards and reasonable costs.

Our green purchasing measures will include the following:

- Encourage and favour eco-friendly and power-efficient products.
- Prefer recycled, compostable and bio-degradable products.
- Buy seasonal and locally produced goods as far as possible and thus avoid transporting energy.
- Buy in bulk to reduce packaging waste.
- Favour organic fertilizers and less harmful cleaning agents.
- Prefer eco-friendly designs and eco-labeled products.
- Prefer to purchase from a less polluting source or use clean technology.
- Encourage and prefer vendors who use recycled packaging material. Explore the possibilities of further reuse and/or recycling with the vendor.
- Green the supply chain by seeking vendors who share our values and have an environmental management system in place.

6. DESTINATION PROTECTION

The natural environment is one of the primary attractions for leisure visitors. To develop sustainable tourism, we will:

- Ensure the protection of the natural and cultural values of the area while developing and creating recreational facilities and activities for our guests.
- Participate in efforts to restore habitat whenever possible.
- Promote local food, entertainment, culture and cottage industry.
- Engage with local people when developing cultural attractions.
- Provide guests with a list of environment-friendly products and local souvenirs that they may shop for.

7. CONSERVATION OF MARINE LIFE AND REEFS

The ocean and the reefs are home to numerous sea creatures and plants, many of which are fragile and endangered. We will take every possible step towards the conservation of marine life and the protection of our reefs.

Measures taken by our property will include:

- Ensuring wastewater is not discharged into the ocean
- Using ecological or organic fertilizers
- Sensitizing our team members and guests about the negative environmental impact of littering on the beach and in the sea
- Ensuring all trash is properly disposed of and no debris is left hanging on the beach
- We must sensitize our guests and ensure with service providers that snorkelling and diving are practised in a way that does not affect our coral reef.
- Encouraging and supporting clean-up of the marine and coastal environment
- Complying with local conservation policies, e.g., by coral transplanting for coral rejuvenation
- Keeping boats clean and in proper working condition to minimize noise pollution
- Plant trees as they reduce runoff into the oceans and contribute to reversing the warming of our Planet and the rising temperatures of our oceans
- Keeping the IUCN Red List and national conservation list species with habitats in areas affected by its operations by levels of extinction risk.

8. BIODIVERSITY AND PROTECTION OF WILDLIFE

Biodiversity boosts ecosystem productivity, where each species, no matter how small, has an important role to play. To protect biodiversity, we will:

- Reduce our use of insecticides, weed killers, and fungicides.
- Use organic fertilizers
- Use environmentally friendly products for cleaning.
- Buy sustainably harvested seafood and agricultural products.
- Water plants in a rational way
- Use indigenous plants for landscaping and minimizing light and noise.
- Ensure that invasive alien species are not introduced in our gardens and landscapes.
- Not display or sell products made from threatened or protected plant and animal species.
- Participate in ecological restoration initiatives in the local area.
- Not detain any captive wildlife on property grounds, except for wildlife breeding farms, rescue or reintroduction, according to law and best practices.
- Protect land-based and marine wildlife and do not disturb it in any possible way.

Raffles Maldives Meradhoo complies with this policy as far as reasonably possible.

SUSTAINABILITY MANAGEMENT PLAN

PURPOSE

The Sustainability Management Plan is to ensure that decision-making within our group contributes to achieving its objectives, improving its sustainability, reducing its long-term environmental impact and increasing the welfare of employees, guests and the environment that surrounds us. The Sustainability Management Plan is to guide the daily operations of the business sustainably in considering the environmental, socio-cultural, quality, and health & safety issues.

Energy Conservation objectives

- Green energy utilization
- Reduction in the amount of CO2 emissions
- Optimize energy efficiency of plants
- Reduce energy expenditure

Waste management objectives:

- Reduce water expenditure
- Reduce the amount of non-recyclable waste
- Increase the amount of waste that we recycle.
- Improve the results obtained in previous years.

General objectives:

- Achieve Green Globe certification
- Lead the decision-making process to be more sustainable
- Develop a business strategy based on sustainability, quality, safety & health

Satisfaction goals:

- Increase commitment to our customers
- Increase customer satisfaction measured by surveys
- Provide clients with information on good waste management practices
- Provide clients with information on the company's CSR projects

Training objectives:

- Raise awareness of the company's CRS Colleagues
- All colleagues are aware of environmental policies
- Conduct Recycling training for colleagues
- Train a minimum of 1 department per year in sustainability

SCOPE

The scope of the Sustainability Management Plan covers all activities at properties coming under Raffles Maldives Meradhoo and its integration with all colleagues, customers and guests, business partners, owners, other stakeholders, and the environment at large.

REFERENCE

Green Globe Certification Standard and Guide to Certification.

RAFFLES MALDIVES MERADHOO RESORT VISION

We consider Green Globe to be the premier global certification for sustainable travel and tourism. Green Globe Certification offers the world's most recognized and longest-running program, allowing us, as one of the green leaders in the travel and tourism industry, to confidently promote our environmental credentials along with our commitment to the people and prosperity of our location.

Sustainability within Raffles Maldives Meradhoo Resort is defined as "carrying out its business in line with our company's guiding principles of being conscious of global environmental issues and acknowledging our responsibility towards the environment. While the well-being of our guests remains at the forefront, we commit ourselves to carrying out operations in a sustainable manner, taking every step to minimize operational impact on and preserve the environment wherever we operate."

We believe our guests, colleagues and environment are equally important. Our Sustainable Management Plan ensures colleagues, customers, business partners, owners, other stakeholders, the environment and the property are taken care of.

Our Sustainability Management Plan encompasses four key areas:

- Environmental– To be actively involved in conserving resources, utilizing renewable energy to the extent possible, reducing pollution, and conserving biodiversity, ecosystems, and landscapes.
- Socio-cultural– To be involved in corporate social responsibility actions, community development, local employment, fair trade, respect for local communities, and colleague protection. Being involved with activities to support the local community
- Quality– Any activity that can sustain itself economically through creating competitive advantages within the industry with inspired service that not only meets but exceeds guest expectations; it continues to contribute to the economic well-being of the surrounding community through local ownership, employment, buying local products, etc. A sustainable business should benefit its colleagues, customers, business partners, owners, and other stakeholders.
- Health & Safety– Raffles Maldives Meradhoo Resort complies with all established health and safety regulations and ensures that protection instruments are in place for both guests and colleagues.

1. SUSTAINABLE MANAGEMENT

Implement a Sustainable Management Plan (SMP):

Our resort shall establish and maintain the SMP, complying with the requirements included in this section.

Our property will provide and write Policies and Procedures that:

- are appropriate to the nature and scale of the organization's activities;
- are aligned with the four key SMP areas, i.e. Environmental, socio-cultural, quality and health & safety issues;
- Include a commitment to continual improvement of the SMP;
- Include a commitment to comply as a minimum with the current applicable legislations, regulations and other requirements to which the organization subscribes;
- Provide a framework for setting and reviewing SMP objectives and targets;
- are documented, implemented, maintained and communicated to all colleagues;
- are available to all interested and affected parties, and
- They are reviewed periodically to remain relevant and appropriate to the organization's SMP.

Renewable Energy Initiatives

Initiated projects to install Solar PV panels on all available rooftops in Raffles Maldives Meradhoo Resort. Solar power plants have already been commissioned by Jerry & Jason, China.

Legal Compliance

The resort is licensed according to the law of the Republic of Maldives and in compliance with all relevant international or local legislations and regulations, including health, safety, labour, and environmental aspects, and insurance policies and other guest and colleague protection instruments are up to date and in order.

Colleague Training

Colleague hiring, training, annual appraisal, and performance review at our property are in line with the corporate competencies and competency models based on the mother brand, ACCOR, and beliefs and expectations. At Raffles Maldives Meradhoo, we strongly believe that it is important to follow all the processes to achieve a healthy and balanced team by encouraging internal development and growth.

Customer Satisfaction

Raffles Maldives Meradhoo monitors customer satisfaction by receiving feedback in different ways and platforms. We strongly believe in accepting and working with any kind of positive or constructive feedback provided by our guests.

Besides customer satisfaction, we also review and monitor internal quality performance and satisfaction. Some of the tools used for monitoring and reviewing the same are:

1. Trust You
2. Internal email survey sent to our guests towards the end of their stay
3. 24 – 48 hours' feedback
4. Guest emails
5. All 3rd party online platforms such as TripAdvisor, Booking.com and all social media channels.

Accuracy of Promotional Materials

All communication regarding promotional material at our property goes through the Sales and Marketing team and is in line with the company standards (ACCOR & Raffles), local regulations and cultural norms.

We do not overpromise or mislead our guests; promotional materials are truthful and do not promise more than can be reasonably expected by customers.

Local Zoning, Design and Construction

Our property is located on an uninhabited island, which may have been operating as another resort previously. No significant local sites, water courses, wildlife of any sort, vegetation, or residents would have been disturbed adversely.

Ongoing maintenance and repairs are performed regularly. The refurbishments, if any, include reusing as much of the original structure as possible, incorporating local design and architecture (i.e. Kazan roofing, coir, wood and bamboo) and renovation/interior design is always performed to be as sustainable, energy-saving and long-lasting as possible, and includes the use of environmentally sound materials.

Interpretative Tourism

We inform our guests about the local environment, local culture and cultural heritage through various means, may it be electronic or something as simple as friendly dialogue with guests. As the Maldives is predominantly a Muslim country, guests are made aware of the local culture during the holy month of Ramadan as the special emphasis is placed on the period of fasting.

Special Maldivian cuisine is served in our main restaurant, and local cuisine cooking classes are offered to our guests.

On arrival at the resort, each guest is greeted with the sound of bodu-beru (traditional Maldivian drums) and the blowing of Sangu (Giant Triton), with our colleagues dressed in traditional clothes. During special events, i.e. weddings, our colleagues wear traditional clothes, and there is always local entertainment for our guests. Various expedition packages are available with the Resorts to visit nearby local islands so that guests can experience the real Maldives, interact with the local community and support local businesses like handicrafts and other souvenir shops.

Communications Strategy

We communicate with our guests and visitors to the resort and the website in a comprehensive manner. Our implementations, plans and strategy for a sustainable operation are clearly defined, as well as our involvement with the local community and other charity work.

Our sustainable operations involve our guests; for example, we have placed a Sustainability "Acting Here" Card in all the villas. To give our guests an option whether or not they want the bed linen and/or towels to be replaced for the day, hence providing them with an opportunity to play a direct role in water and energy conservation.

Through our "Green Book", guests are informed about energy and water conservation practices and waste management initiatives and also reminded of the damage inflicted on fragile coral if one stands on them and the need to protect the ecosystem around the island.

In the same way, guests are also politely requested to not collect or remove shells from the beach, even empty ones, as they could be the homes of hermit crabs.

Health and Safety

We follow strict environmental, health and safety laws, regulations, and procedures to conserve and protect the environment and create a workplace where we bring the best out of our colleagues whilst avoiding the risk of injury.

Colleagues are appropriately trained to make them aware of the health and safety issues while working, and guests are made aware of hazards by using appropriate signage and other forms of communication.

The purchasing and operating policy for all mechanisms, equipment, and facilities is that they be as environmentally friendly as possible: low emission and minimum consumption of energy. Another requirement we try to meet is to procure goods and equipment which are durable and long-lasting.

We have an experienced team of engineers and technicians who maintain the facilities and equipment so that we have constant checks on them being in good working condition. All necessary and mandatory safety requirements for the same are in order, such as Risk Assessments and the use of Personal Protective Equipment.

We have engaged the services of a Food Safety Company – Nsure Pvt. Ltd. - who visits the premises quarterly to ensure the food safety compliance systems are in order. New kitchen colleagues are trained on safety and procedures and must undergo a mandatory basic food hygiene course in food handling.

Highlights

- Guests are made cautious by posting safety instructions in the villas and other public areas.
- Swimming pool depth is marked, including pictorial No Diving Signs, life rings and notice boards.
- Basic Health and Safety training, fire training, and evacuation drills are conducted regularly for colleagues.
- All paint is environmentally friendly and lead-free, with low VOC content.
- An active in-house system is in place whereby colleagues are trained to report any malfunctions and leaks immediately.

Disaster Management

In the Maldives, tsunamis are a real threat; our property takes its disaster management plans very seriously, taking into account the three R's: readiness, response, and recovery.

Fire Safety: The resort uses the services of a third party, Global Fire Services PVT, to inspect, analyze, advise, train, and certify all colleagues.

Yearly drills involving all staff are held, where a real disaster is simulated, and practice responses are undertaken. All drills are observed by independent parties, and observations and reports are written.

2. SOCIAL/ ECONOMIC

Community Development

This section is supported by the Raffles Maldives Meradhoo Resort's CSR policy; the policy states that the resort recognizes its role and responsibilities in contributing to the sustainable development of the communities in which it operates. This policy aims to maximize the return on community investments and their impact on the local community.

Through our community investment initiative, we have identified unique areas of involvement where we can actively support our local communities and engage in a mutually rewarding way with our stakeholders.

Education: Supporting initiatives focused on vocational training and skills development that improve employability in the tourism and hospitality sector. This is done by taking on interns from local educational establishments and supporting their growth and development. Further job opportunities are offered within the company.

Healthcare: Supporting initiatives aimed at enhancing the health and well-being of local communities. We look into schemes of donating and sponsoring the health facilities at local islands.

Cultural Preservation: Supporting initiatives aimed at enhancing the ability of small businesses that are strategically linked to business needs to perform more effectively to create economic growth. We regularly buy from local producers and support local fishermen.

Environmental Protection: Supporting initiatives that help protect the integrity of the environment. We are committed to protecting and maintaining our marine environment, chiefly our house reef, which is constantly rated as one of the best snorkelling/diving spots in the Maldives. We have an in-house Marine Biologist who conducts regular checks of the health of the reef, and we are proud to say that until now, we have consistently maintained the biodiversity. Additionally, we have initiated a program to catalogue all the marine species that are found in our waters, which will aid in our conservation and education efforts.

We also want to support initiatives that use innovative products and services to help solve environmental problems.

Local Employment

Raffles Maldives Meradhoo proactively supports the recruitment and development of Maldivian nationals at various managerial level positions across its operations. It supports functions with a view that such Maldivian nationals will be supported, mentored and guided to grow and move into leadership positions across the company.

The element of local employment is supported by:

- Equal Employment Opportunity policy (part of the Accor & Raffles Ethics and Conduct Policy)
- Code of Conduct policy (part of the Accor & Raffles Ethics and Conduct policy)
- Corporate Social Responsibility Charter
- Workplace Health and Safety Policy

Fair Trade

Fairtrade within our properties is driven by the "Procedure Goods & Services" process in the Maldives, wherein resorts ensure the use of the right methods to select suppliers and procure goods and services at the right quality, price, time, source and delivery while protecting the company.

Our Policy:

"We at Raffles Maldives Meradhoo ensure that all processes are done in compliance with relevant laws and consistent with ethical, social and environmental standards."

Local Entrepreneurs

Raffles Maldives Meradhoo does not engage with local entrepreneurs who are dealing with historical artefacts. Moreover, it is not permitted by law.

It is worthwhile to state that we do engage in organizing events and activities that portray the local culture, especially during Ramadan, Eid, and Maldives National Day. Local craftsmen and businessmen are encouraged to visit our property to enable them to enhance their living, giving guests a chance to interact with them and learn about local cultures.

Respect Local Population & Culture

As stated earlier, the Maldives is predominantly a Muslim country, and as such, guests and colleagues are made aware of the local culture. All efforts are made, where applicable, that due respect is given to the local values and beliefs, and we commit to safeguarding the Maldivian culture and ensuring that the local community shares in the benefits of tourism.

Exploitation

Our property is in strict compliance with the Maldives Labour Law. Hence, appropriate policies are in place against the employment of children, sexual harassment and exploitation.

Equitable Hiring

Raffles Maldives Meradhoo promotes diversity and equality on all levels of the business, and no colleagues or applications are discriminated against in any way.

All positions are filled based on competence. Our resort adheres to all local laws and regulations concerning labour laws and offers conditions and wages superior to the minimum requirements.

Raffles Maldives Meradhoo employs people of many nationalities – currently, we have no less than 20 different nationalities on our property. Women candidates are encouraged to apply across all levels of the business. The Maldives has strict labour law-related issues, which we adhere to in full.

Colleague Protection

Salaries and benefits meet national regulations, and all payments required by law into insurance and pension funds are made on behalf of all colleagues. Overtime is paid for hours worked beyond the established work per Maldives labour law. Week hours and working hours do not exceed the legal maximum established by the labour law, but being in the hospitality industry, at times, a need might arise to work additional hours; colleagues are accordingly remunerated as per the policies outlined.

To further enforce colleague protection at our property, the welfare Committee comprising colleagues of all levels and the management hold regular meetings and ensure that any concerns or ideas from any colleague are given due consideration and actioned on if possible.

Basic Services

The activities of the business have not impacted or jeopardized resources or services in the local area or neighbouring communities in any negative manner. The activities of the business generate many secure jobs and reflect a positive influence on the community.

Local Livelihood

Since our resort is located on independent islands, and the business encompasses the entire island, its activities do not affect any of the other islands around it. Access to land, water, housing, right-of-way and transport for any neighbouring communities has not been impacted at all. On the contrary, the activities of the business contribute to the economy of neighbouring islands by creating jobs and buying from them.

Bribery and Corruption

Raffles Maldives Meradhoo Resort prohibits all forms of bribery, directly or through third parties, including employees, from soliciting, arranging or accepting bribes.

No direct or indirect contributions to political parties, etc, are made as a way of obtaining an advantage in business transactions.

The resort will not deal with contractors and suppliers known or reasonably suspected to be paying bribes. Due diligence is undertaken in evaluating prospective contractors and suppliers to ensure that they have an effective anti-bribery Program.

The element of avoidance of bribery and corruption is supported by:

- Code of Conduct policy (part of the Accor & Raffles Ethics and Conduct policy)
- Gift policy
- Anti-bribery and corruption policy

3. CULTURAL HERITAGE

Our colleagues are trained to guide guests towards the cultural sights and events and/or entertainment/restaurants that the guests are most interested in.

Local Maldivian culture and idiosyncrasies can be explained and discussed with guests, but mainly in a nice-to-know form, as the culture is significantly different from anywhere else in the western/developed part of the world, from where we have a substantial number of guests coming from.

Guests can read through the basic do's and don'ts in our in-house Green Book through a direct stream, which contains the resort's environmentally conscious literature containing information on the resort's sustainability initiatives, what they are doing for the environment and how guests can help.

Historical and archaeological artefacts are not sold, traded, or displayed. The business complies with laws, standards and regulations concerning the protection of historical sites and cultural heritage.

Goods which are protected and may not be bought or taken are communicated to guests through in-house literature.

The Maldives is a treasure of marine diversity and fragile coral, and their protection and natural growth are publicized as much as possible.

The villas and all public areas are of rustic ethnic charm and blend in naturally with the surroundings and landscape. The scenic beauty of the Maldives is enhanced through our thoughtful architecture and design of structures.

4. ENVIRONMENTAL

Our Resort sources and obtains many locally produced goods, including Watermelons, Papayas, Kurumba, Bananas, and many others, which have been grown organically. Freshly caught fish using the pole and line method is brought directly to us just off the sea by local fishermen every day.

As much as possible, we favour suppliers who conduct their business responsibly and ethically. We buy in bulk to reduce packaging waste. We prefer products that are eco-friendly, biodegradable, made from recycled material, and have minimum impact on the environment.

We do not use invasive alien species in our gardens and landscapes; we also minimize the trimming and try to keep the native vegetation as undisturbed as possible. Measures are taken to prevent the introduction of pests and exotic species.

No captive wildlife, endangered species, products, or unethical items are used, sold or allowed on our Resorts. Our business activities do not impact the habitat of local wildlife or plants; appropriate measures are taken to minimize noise, chemical pollution, and artificial lighting from impacting wildlife.

Endangered species, products thereof, or items stemming from unsustainable practices are not sold, traded, or displayed on the property grounds.

Guests are provided information about protected areas within the property and influence zone and encouraged to visit protected areas.

Guests are provided with information on native wildlife and plant species found in the area through our Green Book.

The element of environmental protection is supported by:

- Environmental Policy
- Pollution Management Plan
- Landscaping Policy
- Biodiversity Policy
- Green Book

This concludes the Sustainability Management Plan for Raffles Maldives Meradhoo Resort in 2023.

We know sustainability is an ongoing journey; therefore, the Sustainability Management Plan will be reviewed annually.

The resort will continuously measure and monitor the following at planned intervals to verify that we are achieving continuous improvement in the field of sustainability:

- Electricity consumption
- Water consumption
- GHG emission
- Amount of waste generated by the resort

Our Sustainability Management Plan is supported by the following Policies and procedures along with other supporting documents:

- Environmental Policy
- Health and Safety Policy
- Business Ethics and Conduct Policy
- Waste Management Plan
- Environmentally Preferable Purchasing policy
- Environmental Impact Assessment Report
- Landscaping Policy
- Pollution Management Plan
- Disaster Management Plan
- Green Book
